Salt Water Disposal Service

Terra Renewal's privately owned, environmentally controlled Salt Water Disposal (SWD) facility located in Jerusalem, AR serves oil and gas companies working in the Fayetteville Shale play.

THIS FACILITY OFFERS:

- ▲ **Manned 24/7/365 flexible service:** We'll receive your material via third-party transport or we will transport for you.
- ▲ **High capacity:** Our facility can handle up to 10,000 bbls. per day and is designed for quick unload times – we handle 12 trucks per hour during peak traffic.
- ▲ **Full service:** We offer transport and disposal for production and flowback water. We also provide land application, material transfer and frac tank and equipment rental.
- ▲ **Environmentally sound, safety-first site:** Our facility is clean, well-lit, and safely off the main thoroughfare. All loads are tested to assure compliance with ADEQ standards. Drivers and onsite employees are required to wear personal protection at all times.
